

**Blade R** All in one

**Invisible source,  
ultimate comfort.**

# Functional and formal integration in architecture.

From chaos to order: Blade R integrates, simplifies and restores purity and harmony in ceilings.  
Absolute, functional and formal integration.

32 devices without Blade R

11 Blade R

Blade R is a masterpiece of precision that integrates perfectly into architecture as never before: a jewel of precision that turns light into an element of formal and functional fusion with architecture. Architects designing spaces have the task of combining elements and functions through harmonious integration, thereby ensuring overall value and liveability of the architectural environment for users. While furnishings can be designed within the same space and, consequently, be fully integrated into the context, other functional and

technological elements are often already available on the market with specific designs that do not always allow formal harmony between themselves and within the architectural setting. Blade R seeks to respond to this dual need for functional and formal integration. More advantages and more functions in a single product. The first advantage is that people live in a "cleaner" space while also enjoying many other services, in addition to lighting. All in One.

## Light beyond light.

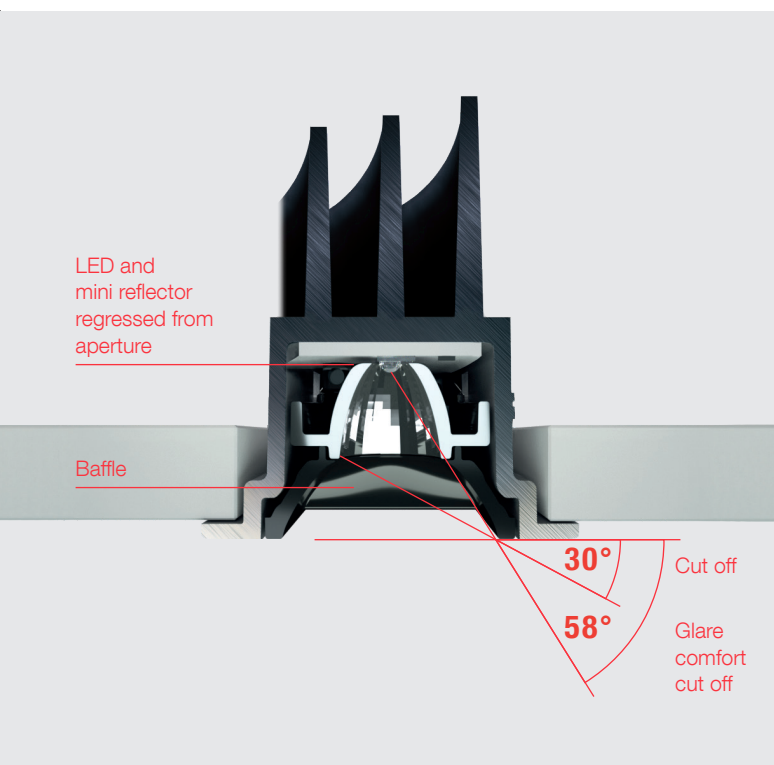

Blade R satisfies numerous space requirements, complying with safety standards and meeting changing trends in user behaviour.

## Extreme reliability.

The performance of the Blade R luminaires has been tested and certified in compliance with existing regulations to guarantee their functionality, even when other devices are attached.

# Overview

## Blade R

6 cells  
16 W / 870 lm

12 cells  
29 W / 1 675 lm

## Blade R

18 cells  
39,5 W / 2 650 lm

30 cells  
60,5 W / 3 770 lm
