

Custom Acoustic Dividers

Lumetta's Lattice and Element Custom Acoustic Dividers transform the acoustics and aesthetics of any interior space. Our light-weight sound-absorbing acoustic panels help create separate quiet spaces that look extraordinary while improving the surrounding acoustics and insulating your world.

Product Details:

Lumetta's Custom Acoustic Dividers are made with our exclusive washable, antimicrobial Lumenate® incorporated into the panels. Customers and employees can maintain safe social distancing and stay focused, while enjoying the seamless fusion of sound management and decor.

Each divider is more than 1/2" thick, but never bulky or heavy. Our 60% recycled 9mm PET designer board material construction in your choice of 20 vibrant colors makes these panels eco-friendly and responsibly sourced.

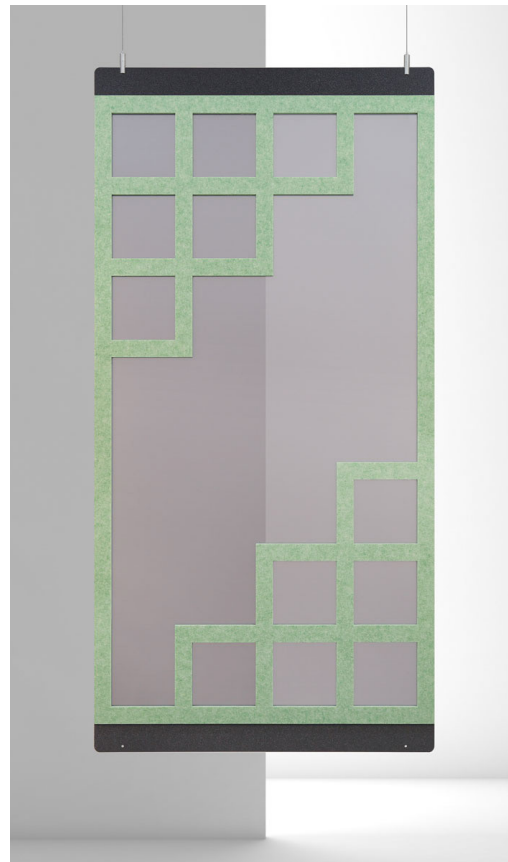

Includes powder coated steel frame, 2 adjustable steel suspension cables and user-friendly mounting hardware.

Suitable for damp locations.

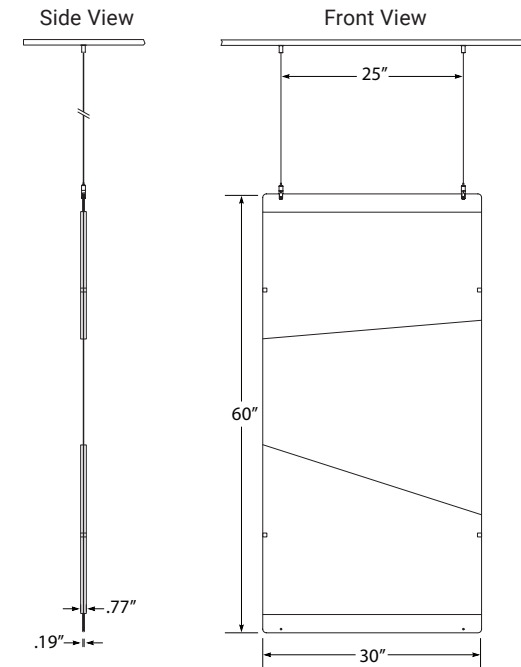

Dimensions: 30" W x 60" H

SP009545A Element

SP009545B Lattice

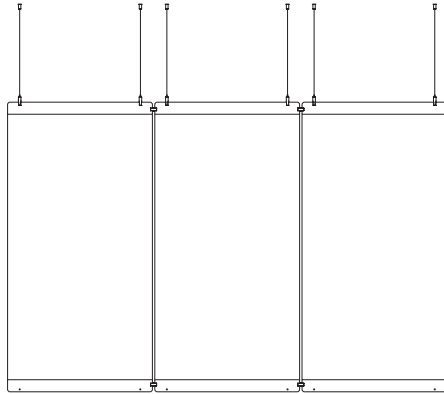

Configurations

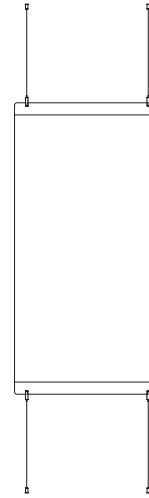

Can be Joined for Longer Lengths

Our standard 30" x 60" dividers can be joined from side-to-side to form a 5' x 5' panel (or arrays of longer lengths in 30" increments).

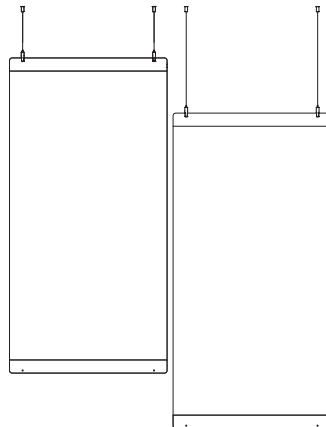

Can be Ceiling Hung and Floor Mounted

These innovative dividers can be hung from the ceiling and mounted to the floor (table, desk, etc.) for additional support if required.

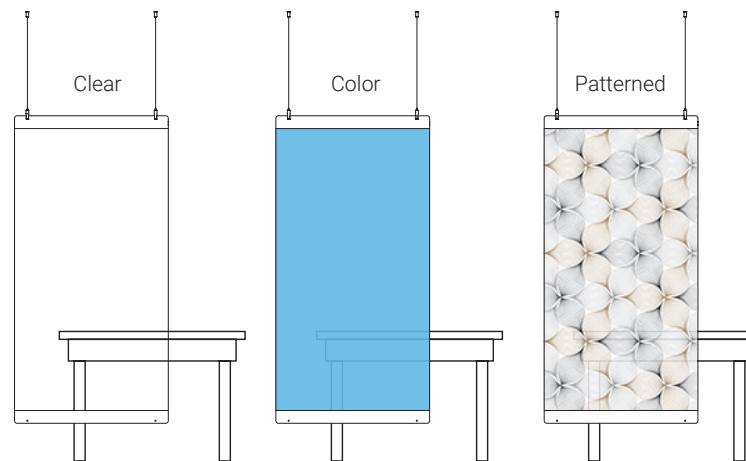

Adjustable Heights

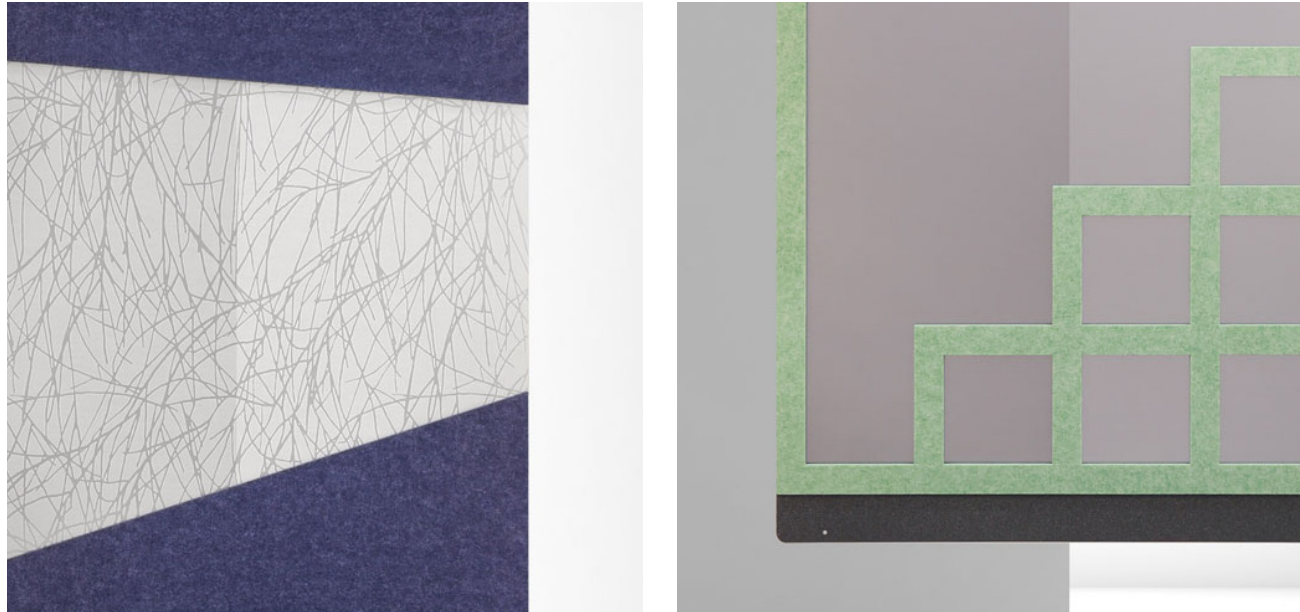

Stagger divider heights to accommodate for optimal clearance of variable heights as well as visual interest.

Clear, Color or Patterned

Chose from our selection of clear, color or patterned panels to enhance your arena.

Custom Acoustic Dividers

Our Custom Acoustic Dividers create temporary or permanent partitioning for private spaces—reducing ambient noise and distraction.

And with our exclusive washable, antimicrobial Lumenate® incorporated into the panels, customers and employees can maintain safe social distancing and stay focused, while enjoying the seamless fusion of sound management and decor.
